

Metrotile Woodshake

Metrotile[®]
worldwide roofing systems

Warm wooden roofs without the need for regular treatment

Metrotile Woodshake tiles are a perfect imitation of traditional wooden shakes. They have a natural, rustic look with lots of character and are ideal for commercial and residential properties.

You can now enjoy all the benefits of a warm and elegant wood roof, but without the need for regular treatments against tree debris, moss or fungus. These tiles are affordable, fire resistant and have a long lifespan.

Lightweight

Light and easy to handle and install.

Durable

Colour stability and protects against UV light.

Stable

Resistance to extreme wind or earthquakes.

Strong

Exceptional strength and resistant to damage.

Fire proof

To be conform with the European standards

Installation of the tiles

The Metrotile Woodshake tile panels can be interlocked either right over left or left over right with the side laps of one small corrugation.

The panels are placed onto battens spacing 368 mm.

The downturned front edge and the upturned rear edge of each tile provides a strong, weatherproof, overlapping and interlocking roof covering. Each panel is secured by 4 nails in the front downturned edge into the side of the batten, positioned out of the water course.

Each panel or accessory can be cutted or bended in the shape of the roof. It is important to use tools recommended by Metrotile.

Accessories

Metrotile offers a broad choice of accessories that fully integrate with the Metrotile Woodshake profile.
