

Metrotile ROMANA

R6-PA

A roof panel inspired by traditional Mediterranean architecture.

Units in mm

Design

The Metrotile ROMANA is designed to create the style of traditional Mediterranean roofs from tradition of centuries of architecture.

Metrotile ROMANA is a stone-coated panel pressed from a high grade of Aluzinc® coated steel and is available in a wide selection of colours to enhance any exterior colour scheme.

Installation

The roof panels can be interlocked either right over left or left over right with the side laps of one small corrugation.

The panels are placed onto battens spacing 368 mm.

The downturned front edge and the upturned rear edge of each tile provides a strong, weatherproof, overlapping and interlocking roof covering. Each panel is secured by 4 nails in the front-downturned edge into the side of the batten, positioned out of the water course.

Specifications

Minimum pitch	15°
Maximum pitch	90°
Size of tile - overall*	1165 x 400 mm [preliminary]
Size of tile - cover*	1085 x 370 mm [preliminary]
Gauge of steel	0,50 mm [preliminary]
Linear cover width*	1085 mm [preliminary]
Coverage*	0,401 m ²
Weight per m ² **	7,47 kg
Weight per tile **	3,00 kg

* The measurements and the weight may vary slightly by the finish that is added to the accessory.

** Steel thickness according to the EN 10346.

Packing

Pieces per pallet	360 [preliminary]
Pallet composition	18 stacks of 20 pieces
Pallet dimensions	1400 x 1100 mm x 800 mm
